

**Writer** has all the features you need from a modern, full-featured word processing tool. It's simple enough for a quick memo, and powerful enough for complete books with contents, diagrams and indexes.

**Calc** is the spreadsheet program you've always needed. It's intuitive, easy to learn for newcomers, robust and rich in features and functions for professional number crunchers and data miners.

**Impress** is a professional program for creating multimedia presentations, which can be enhanced with 2D and 3D clip art, transitional styles and special effects, high-impact drawing tools and animations.

**Draw** lets you produce anything from a quick sketch to a complex plan, to communicate with graphics and diagrams. With a maximum page size of 300 by 300 cm, is an excellent package for technical drawings and posters.

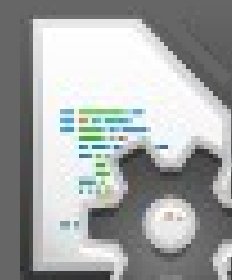

**Base** is a desktop database designed to meet the needs of most users, which can also be used as a front end to most enterprise-class databases.

**Chart** is a business graphics module, integrated with Calc and Impress, which lets you create histograms, pie charts and other visual representations of data.

**Math** is LibreOffice's formula editor and can be used to insert mathematical and scientific formulas into items such as spreadsheets, text documents, presentations and drawings.

LibreOffice comes with an open, documented and completely scriptable API. LibreOffice supports several scripting languages such as Basic, Python and PHP, for administrators and developers.

## Writer
