**Description**

In time for the LibreOffice Conference, we should compile a list of EasyHacks to be presented during your talk. A starter can be found in Redmine by filtering for the specific tag.

### History

**#1 - 2015-08-19 12:46 - Florian Effenberger**

- Status changed from New to In Progress

**#2 - 2015-09-21 13:30 - Florian Effenberger**

First set of EasyHacks to be done for Alex' infra talk
Subsequently, depending on the flow of the list, it needs regular updating to have enough EasyHacks to attract new infra contributors
Expectedly every 2-3 months
List can be in the wiki or (even better) in Redmine

**#3 - 2015-10-01 14:03 - Florian Effenberger**

Did you show some EasyHacks during your talk? Makes sense to distill them into either tickets or some wiki page for further follow-up ;-) 

**#4 - 2015-11-09 16:05 - Alexander Werner**

- Status changed from In Progress to Closed

I created a redmine query that shows possible EasyHacks. Closing.

**#5 - 2015-11-10 11:17 - Florian Effenberger**

- Status changed from Closed to In Progress

Hm - where can I find this query? ;-) 

**#6 - 2015-11-16 22:44 - Dennis Roczek**

on the right sidebar "custom queries - easyhack"

**#7 - 2015-11-17 12:52 - Florian Effenberger**

- Status changed from In Progress to Closed

Indeed, thanks!
