It seems AOOo Bugzilla found a way to suppress obsolete Versions in the Version picker, please try < https://issues.apache.org/ooo/show_bug.cgi?id=3790 >			
The old version is visible, but it's not possible to select one of the lots of old Versions you see in			
Report < https://issues.apache.org/ooo/report.cgi?cumulate=0&resolution=---&y_axis_field=version&width=600&height=350&action=wrap&format=table >			
We should get something similar, our LibO-Bugzilla-admins can set an "Donotshow" flag to more than 1 year old alpha and beta versions, what makes them invisible for new selections in pickers. But the admins have the possibility to assign also those obsolete Versions to bugs if necessary; I doubt that that will happen too often.
