Problem description:

If Extension Name heading exceeds column width heading should be wrapped

Steps to reproduce:

1. Go to <http://extensions.libreoffice.org/extension-center>
2. Search for
"RepublicOfChinaTaiwanTraditionalChinesePunctuationToolbar"

Current behavior:

Heading for Extension description exceeds column width.
That works fine for long names with blanks in it like "OpenOffice.org2GoogleDocs - export & import to Google Docs, Zoho, WebDAV", so maybe the solution is to simply modify the name if that extension?

Expected behavior:

Should be wrapped to next line

Operating System: Windows 7
Version: 4.2.5.2 release

History

#1 - 2018-06-06 18:56 - Andreas Mantke

- Status changed from New to Closed

The long title wraps to the next line within the new extensions website.
