Bugcruncher 2014-07-14 06:42:20 CEST Created attachment 102736 [details] Screenshot			
Problem description: If Extension Name heading exceeds column width heading should be wrapped			
Steps to reproduce: 1. Go to < <a href="http://extensions.libreoffice.org/extension-center">http://extensions.libreoffice.org/extension-center</a> > 2. Search for "RepublicOfChinaTaiwanTraditionalChinesePunctuationToolbar"			
Current behavior: Heading for Extension description exceeds column width. That works fine for long names with blanks in it like "OpenOffice.org2GoogleDocs - export & import to Google Docs, Zoho, WebDAV", so may be the solution is to simply modify the name if that extension?			
Expected behavior: Should be wrapped to next line			
Operating System: Windows 7 Version: 4.2.5.2 release
