Description			
<p>There are certain developer tasks that so far are merely undocumented and on unmaintained machines. A tool like Jenkins or similar should be used to regularly pull or gather data and mail it around when necessary.</p> <p>List of things to have there:</p> <ol style="list-style-type: none">1. Bugzilla statistics2. IZBot3. api.libreoffice.org4. docs.libreoffice.org5. cppcheck (http://nabble.documentfoundation.org/CppCheck-Report-Update-tp4156085p4159095.html)6. gerrit digest7. coverity (gandalf)8. lcov.libreoffice.org (tb31 w/ jenkins)9. regression hotspots list10. MABs/high priority digests11. regression stats12. bibisect stats13. EasyHack digests14. committer stats15. download stats16. tinderbox stats17. clang warnings and plugins18. bazillion other things done manually on releases or elsewhere <p>This ticket is a follow-up from #1422 See also http://devcentral.libreoffice.org</p>			

History

#1 - 2018-10-16 16:52 - Christian Lohmaier

- Target version changed from Qlater to Q4/2018
- Start date set to 2018-11-26

think I can tackle it starting end of November/after 6.2 beta1

#2 - 2019-07-24 14:20 - Florian Effenberger

- Assignee deleted (Christian Lohmaier)
- Target version deleted (Q4/2018)

I think this is way old/legacy now - feel free to reopen if that assumption is wrong
