

## Infrastructure - Task #2544

### libreoffice.org should have a language selector

2018-02-22 15:36 - Samuel Mehrbrodt

<b>Description</b>			
<p>There is no way to reach libreoffice.org in a different language (except from guessing the URL or googling of course). A language selector should be added, similiar to <a href="http://www.openoffice.org">http://www.openoffice.org</a> (top right).</p> <p>Once that is there, we should automatically redirect to the users language, and if they switch language, remember that with a cookie.</p> <p>There might be silvestripe modules for this whole thing, no idea about that.</p>			

#### History

##### #1 - 2018-02-23 11:48 - Florian Effenberger

[Christian Lohmaier](#): Wasn't there some work in progress by Jean Spiteri on this?

##### #2 - 2018-03-07 05:59 - Krasnaya Ploshchad'

Once that is there, we should automatically redirect to the users language, and if they switch language, remember that with a cookie.

Alternatively, this can be achieved by simply detecting user agent and HTTP requests.

##### #3 - 2018-03-08 13:56 - Jean Spiteri

[Florian Effenberger](#), sorry to jump in the discussion. Yes, I did something similar and it works for [#2032](#). If a language selector is needed as well, I can add it but I'm not sure whether that's needed.

##### #4 - 2018-03-08 13:57 - Jean Spiteri

- Category changed from Website to SilverStripe

##### #5 - 2018-04-19 18:50 - Jean Spiteri

- Assignee set to Jean Spiteri

Assigning to me since I'm working on [#2032](#). When that is fixed, then also this will be taken care of probably.
