Description			
<p>Currently there's no commit notification in Bugzilla for commits in 'dictionaries' repo (I think there hasn't been in the past, either). It would be nice to have a notification similar to commits from 'core', 'online' and 'help' repos.</p> <p>As an example, see tdf#104332 [1]. Commits [2] and [3] has the usual format to indicate their connection to a particular bug report, yet no notification has been posted, and the usual Whiteboard tag hasn't been added, either.</p> <p>[1] https://bugs.documentfoundation.org/show_bug.cgi?id=104332 [2] https://cgit.freedesktop.org/libreoffice/dictionaries/commit/?id=846e5da4b28bb40158cfb992f3a371614e25a349 [3] https://cgit.freedesktop.org/libreoffice/dictionaries/commit/?id=2d8dd0af877de8494ca9c2c027eba4a42bbc09eb</p>
