Description			
With the successful migration of our machines to the Hetzner Cloud infrastructure, we can upgrade our network setup. The Cloud Console claims			
This server is using the legacy network model. In order to rescale your server or use advanced cloud networking features like floating IPs and private networks you need to upgrade the network model. Your server needs to be powered off in order to perform the upgrade. For more information, please have a look at our wiki.			
with the details at			
<ul style="list-style-type: none">• https://wiki.hetzner.de/index.php/VServerMigration/en• and https://wiki.hetzner.de/index.php/CloudServer/en#Automounting_fails_-_How_can_I_fix_this_problem.3F			
Possibly start with intranet first, and if that is working, also look into mail

intranet.tdf done

mail.tdf pending

#4 - 2020-08-20 00:10 - Guilhem Moulin

Upgraded and powercycled mail.tdf, took the opportunity to upgrade the network model as well.
