I was more involved in the Brazilian Community, which is close to me, but some activities with the Hispanic community too.

+ I have pushed the Brazilian and Hispanic communities to use machine translation to break the language barrier and jump to edit the LO Guides in their own language.
+ Weekly meeting with the Br community of progress about activities and free LO + TDF discussion
+ Part of LATAM LibreOffice meeting
+ Got many feedbacks on wishes for future LibreOffice, community voices, TDF membership management, events
+ I'm developing another deliverable: "Bookshelf". A set of web pages extracted from the Guides and installable locally in companies, libraries, schools intranets, for support to LO deployment.
