Spam/Reject is pretty simple. Should be possible for the owner/maintainer and since s/he receives a message also quickly.

No action needed from our side.

Who's wearing the hat on these, who takes care of dealing with spam?
Who receives the notifications at the moment?

Team is monitoring the comments at https://extensions.libreoffice.org/admin/comments/, as far as possible. In the end it's also up to the maintainer of the extension to deal with comments (that makes it necessary to have an email address on every extension).
