Description

The current default extension list order is older first (today I see PIMACO labels I uploaded during test phase).

We could set the default sort list to newer first, where the date pick is the date of last extension update.

It will turn the entry page of the extension to a dynamic page, with novelties first.

To day the list is by no specific order. Or so it seems.
I'd prefer an alphabetical list which anyone may analyze and understand easily (at least in Western countries :)

sorting isn’t implemented, at least the sorting as it is now is useless.
