Description
Hello,

when an extension website reader sets a filtering tag, he/she has no clue to the way to unset the tag. This is frustrating.

Best,

History

This tag system is not so uncommon. If you figure how to add the tag you will be able to remove.

But to make it more clear we could add a small x to the tag when in the filter list (and a small + when not).

#2 - 2020-07-18 12:02 - Jean-Francois Nifenecker
Hello Heiko,

well, YMMV, but I had a hard time finding how to get rid of that stupid tag I had selected first. The only solution I had found at that time was to reload the page 😞

So, yes, selecting a tag is easy, but a clear way to suppress a selected tag is in order, IMO. The small x is quite usual and would be meaningful, yes.

Best,
