Description			
Hi,			
When I upload an ott file of a text template file, I get an error message "Extension 'ott' is not allowed".

Extensions use .oxl (and consist of a few more files, eg. license). Just rename the oxt file of any other template extension and modify the content for your work.

At the top of the extensions site it written as "LibreOffice Extensions, Documentation and **Templates** repository". And the Writer templates(ott file) uploaded here.

- <https://extensions.libreoffice.org/en/extensions/show/plantilla-curriculum>

What does this mean? ☐☐

If extensions site only allows upload extensions, then you might want to remove the word "templates".

Thank you!

But I'm sorry. The extension/template is missing from my admin page so I can't check it..
