| We need to modify our specific role to add to Add_suggestion the use of translation memory and the use of machine translation services to all language groups otherwise it will be lost after the next Weblate update. |                    |                    |               |

Ha - that fixed itself. In 4.4 that was released yesterday the suggestion role will have the permission even if it is not assigned to the role:

<https://github.com/WeblateOrg/weblate/commit/9f5d6bc3f10761a86c183f0ecea39be4310b84d6>

having "add suggestion" permission is sufficient in order for the user to make use of it.

(and there is no distinction anymore between "use machine translation" and "use translation memory" anymore since those have been combined in

<https://github.com/WeblateOrg/weblate/commit/13ff869e802e0afb444b51f251670ac05565b468> for 4.2)
