Could you have a look at it Christian, you tweaked that in the previous versions if I remember well, thanks!

#2 - 2021-01-25 13:23 - Christian Lohmaier
- Target version set to Q1/2021

Indeed - we tweaked one of the internal roles to fit (namely adding "Delete Suggestions" permission to the "Review strings" role) did that again now, so fixed for the current deployment.

Weblate did make the builtin roles read-only, so I had to temporarily reenable editing of the builtin roles again. (https://github.com/WeblateOrg/weblate/commit/de64a1e6b3574c045dce4a783860999e082bcac8)

I'll keep this one open to make sure we edit the default set of permissions in the code, so it won't be lost on next update/so we don't have to remember to edit the role - we had it for the machine-translation and adding of suggestions, but we forgot about that one...
