Description
The SDK documentation is stuck at LibreOffice 6.4:
https://api.libreoffice.org/

The LibreOffice SDK
C/C++ API Reference is also stuck at 6.4:
https://api.libreoffice.org/docs/cpp/ref/index.html

the same true is for the IDL Reference:
https://api.libreoffice.org/docs/idl/ref/index.html

The necessary steps to update API documentation are presented here:
https://redmine.documentfoundation.org/issues/3052?tab=history#note-11

As discussed in the above issue, there is no need for a Jenkins job. But, for each release such documents should be generated.

A good choice would be generating such documents for different versions, keeping all the previous versions on the website, while using the latest version as the default choice.

History
#1 - 2021-06-22 16:01 - Florian Effenberger
- Assignee set to Christian Lohmaier
- Target version set to Q3/2021

Cloph to write documentation how to handle this
Then Olivier to take over

#2 - 2021-07-26 11:55 - Christian Lohmaier
- Due date set to 2021-07-30

will update the site and docs to generated it later this week.

#3 - 2021-08-02 11:43 - Christian Lohmaier
- Due date changed from 2021-07-30 to 2021-08-06

didn't fit in last week, do it in the next days.

#4 - 2021-08-24 16:44 - Hossein Nourikhah
Thank you Christian. The API pages are updated:
https://api.libreoffice.org/

I think it's OK for now, although I think having multiple versions would be helpful, specially for having latest examples.

#5 - 2021-08-30 17:19 - Hossein Nourikhah
- Status changed from New to Resolved
- % Done changed from 0 to 100
Marking as done.

#6 - 2021-08-30 17:23 - Hossein Nourikhah
- Status changed from Resolved to Closed
