Description			
to be able to see mismatches easier, the total wordcount in pootle should only include the actual to-be-translated stuff and not the terminology as well.			
maybe display it as "54521 (332)" instead with tooltips indicating translation body and terminology.			

History

#1 - 2014-11-24 15:49 - Florian Effenberger

Is this something to be done upstream? Or can we configure it?

#2 - 2015-01-25 15:11 - Florian Effenberger

Cloph?

#3 - 2015-10-17 20:17 - Dennis Roczek

- Subject changed from pootle: separate terminology wordcount from total wordcount to separate terminology wordcount from total wordcount

- Category set to Pootle
