Description			
The LibreOffice pre-3.3 builds should be made available in download archive at http://downloadarchive.documentfoundation.org QA uses these builds to determine if a bug predates the first LibreOffice release

History

#1 - 2014-11-07 13:34 - Christian Lohmaier

not enough disk-space available on current server to put all the old builds on downloadarchive - but can provide them in chunks..

@awerner:

Increase size of the partition for downloadarchive or split it out to separate vm?

#2 - 2014-11-07 13:38 - Florian Effenberger

Chances are Alex doesn't get this ticket - ideally send him a direct email

- Assignee set to Christian Lohmaier

Assigning to Cloph, can be dealt with when bilbo is migrated

#5 - 2015-01-25 22:47 - Friedrich Strohmaier

Hmm, are they stored anywhere?

remember that I put them to pumbaa /srv/old/ but they aren't there anymore. Neither found them in pumbaa backups.

Let's see whether I screwed up this bug ;o))

Friedrich

#6 - 2015-01-26 12:25 - Florian Effenberger

I think we have them in the backups somewhere, but not entirely sure

As this bug has been around for a while (for several reasons) I wonder if it's still recent - Cloph, Sophie, has there been any concrete demand by QA in the past? I personally tend to just close this - or leave it to volunteers - as I think it's not that important anymore after all this time...

#13 - 2016-03-04 14:44 - Alexander Werner

Maybe possible to use the CDN for that.

#14 - 2016-03-04 14:45 - Alexander Werner

[Christian Lohmaier](#): where are the old builds located at currently?

#15 - 2016-03-08 09:43 - Florian Effenberger

#16 - 2016-11-09 13:05 - Florian Effenberger

- Status changed from *Feedback* to *Rejected*

CDN will not happen soon, and I heard no objections to closing this ticket, so doing this now - it's been untouched for ages anyways. Let me know if anyone objects.
